## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17 is finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The transitional word (i.e. between the preamble and the body of a claim) "characterized" and phrases incorporating it ("characterized by", "characterized in that", etc.) are common in applications of European origin in us practice claims containing these words and phrases may be rejectable under 35 USC 112 ¶2 when characterization may connote more than mere description (the dictionary definition); in scientific parlance characterization may imply one or more physical steps or procedures (e.g. structure determination, elemental analysis, or qualitative tests) to identify a product. Since it is rare that applicant intends more than a mere description when using this language, physical steps are rarely disclosed. as such, the reader may be unsure about the meaning of the wording of the claims, and additionally the scope of the claim is often unclear ("characterized" conveys no degree of openness). Usually these troublesome words or phrases can be replaced by the standard transitional words "having", "comprising", "wherein".

Please refer to line 4 of claim 17.

***Claim Rejections - 35 USC § 102***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourke, 293. Please refer to figure 1 and columns 8-10.

***Response to Arguments***

4. Applicant's arguments filed November 4, 2002 have been fully considered but they are not persuasive. Applicant argues that '293 does not disclose a power tool which includes a body and a motor housed within the body. This is incorrect. '293's main invention is the adaptor to the power drill, the drill itself is inherent to the device, and must have a body and a motor housed within the body (even if only a motor housing) to function. Applicant argues that '293 does not disclose that the blade does not pass through the sole plate. The examiner disagrees. As most broadly claimed by applicant, "the blade for sawing passing through the sole plate", the examiner considers that the blade disclosed by '293, passes through the sole plate in that it passes through the plane of the plate. It is noted that applicant has not set forth any structure which would allow the blade to pass through the structure of the plate, such as a slot or opening. Such a limitation would overcome the rejection based on 35 USC 102, over '293.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
